Anthropologie - International Journal of the Science of Man; Annals of Human Biology; Animal Behaviour; Behaviour; Behavioral Ecology; Behavioral Ecology and Sociobiology; Body Image; Demography; European Journal of Social Psychology; European Sociological Review; Economics & Human Biology; Evolution; Evolution and Human Behavior; Evolutionary Human Sciences; Evolution, Mind and Behaviour; Evolutionary Psychology; Gedrag & Organisatie; Human Ethology Bulletin; Human Nature; International Journal of Psychology; Journal of Social, Evolutionary and Cultural Psychology; Marriage & Family Review; Nature Human Behaviour; PeerJ; Philosophical Transactions of the Royal Society B; Proceedings of the National Academy of Sciences; Proceedings of the Royal Society B; Psychology & Neuroscience; Social Network Analysis and Mining; Social Psychology; Social Psychological and Personality Science; Trends in Ecology & Evolution. *In Top 3 reviewers at Behavioral Ecology in 2017.*

## Public engagement

**Media occurrences:** I have given interviews for national (e.g., NRC, Volkskrant, NOS) and international media (e.g., BBC, NBC, The Independent, DailyMail), including radio interviews (Hoe? Zo!radio Radio 538) and TV-appearances (OogTV, Japanese TBS).

**Media coverage:** My work is frequently covered in global news. A 2015 article on natural selection on height in the Netherlands received world-wide coverage and was included in Science's 2015 top stories of the year.

**Popular science writing:** I have also written about my work for a football website (Why football players (and referees) behave like animals, and why that's not an insult), for a Dutch psychology magazine (in-mind magazine), and for a Dutch sociology magazine (Sociologie Magazine).

**Public lectures:** I have given lectures for wider audiences, including a lecture for the opening of the academic year (Are we cavemen in the modern world?) and myth-busting of evolutionary myths at a music- and arts festival.

**Public debates:** I have contributed to scientific public debates. For example, about evolution and human behaviour (Applying evolutionary reasoning to humans) and postponement of parenthood (Kinderen? Dat komt wel; with philosopher Stine Jensen).

## Open Science

I care about making science more robust and reproducible. This is why I am a founder of the Open Science Community Groningen. This community facilitates open science practices through workshops and lectures; connects open science enthusiasts; and stimulates responsible research practices through university policies. Perhaps the easiest way to be open about data is by providing good visualizations. This is why I have given many workshops and courses on data visualisation.
